Tutorial 1
Section-D

- Print Hello world

```
public class Main {  
    public static void main (String[] args) {  
        System.out.println("Hello, Java World!");  
    }  
}
```

- Print variable data type

Print variable data type

```
public class variabledatatype {
```

```
    public static void main (String[] args) {
```

```
        int age = 20;
```

```
        double salary = 200000;
```

```
        boolean structure - isStudent = true;
```

```
        String name = "Vijwal";
```

```
        char grade = 'B';
```

```
                println  
        System.out.println ("age:" + age);
```

```
        System.out.println ("Salary:" + salary);
```

```
        System.out.println ("isStudent:" + isStudent);
```

```
        System.out.println ("name:" + name);
```

```
        System.out.println ("grade:" + grade);
```

```
    }
```

```
}
```

- Print Arithmetic

```
Public class Arithmetic {  
    public static void main(String[] args) {  
        int a = 13;  
        int b = 17;  
  
        System.out.println(a+b);  
        System.out.println(a-b);  
        System.out.println(a*b);  
        System.out.println(a/b);  
    }  
}
```

- Print Relational op

```
public class RELATIONALOPS  
    public static void main (String[] args);  
        int a = 12;  
        int b = 10;
```

```
        System.out.println ("a > b" + (a > b));  
        System.out.println ("a < b" + (a < b));  
        System.out.println ("a == b" + (a == b));  
        System.out.println ("a != b" + (a != b));  
    }  
}
```
